

The best for profiles

For over 50 years, ARMINIUS Tooling has played a major role in the market place as the largest supplier of profile sanding tools. Using the Arminius Profile Sanding, the customers are achieving unbeatable surface qualities on hardwoods, MDF and Veneers.

Following our technical recommendations and having the machine accuracy, our abrasives can achieve high footages. Panels achieving up to 20,000, Edges achieving 25,000 Lineal feet.

These performance benefits can only be achieved by using all of the quality standards adopted by ARMINIUS[®]. With an Arminius tolerance guarantee of +/- 0.05 mm (.002") the customer will have superior performance and quality to meet their needs..

Arminius offers 3 levels of Abrasives and 3 levels of base elements to target the customer's needs. Arminius can target most applications and price options. Custom tooling is no problem for Arminius, diameters, bore, height. These options are made custom to your needs at a standard tool price.

Arminius offers the on line ordering to serve the customer better with very quick turnarounds.

The Arminius technical support team is well known for the knowledge and support to the customer. This includes Machine signoff's, in house operator training, and follow-up visits that are not charged an hourly rate.
